**The Warmth of the Natural Wood Texture**  
Engineered wood is a blend of wood strands, water resistant resins, wax and zinc borate. This stable construction is completed with a tough Kraft paper overlay. Such a compound provides the prestige of a natural cedar texture along with great strength and durability.

## The GOODStyle Advantage:

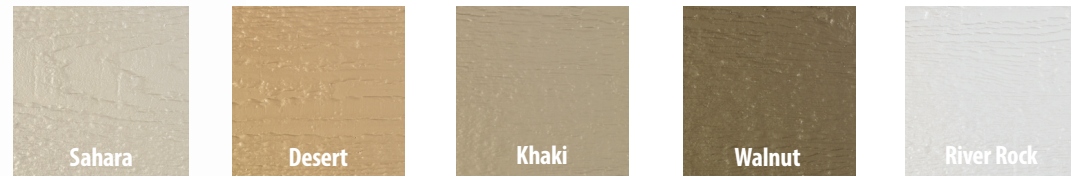

- Extra long 16' planks, produce fewer seams and waste
- Can be cut and installed like wood
- 5/50 year limited warranty, the best in the industry
- Treated with the zinc borate-based Smartguard process to resist insects and fungal decay
- Maximized dimensional stability
- Adding layer upon layer of strength and moisture resistance

## Environmental Commitment:

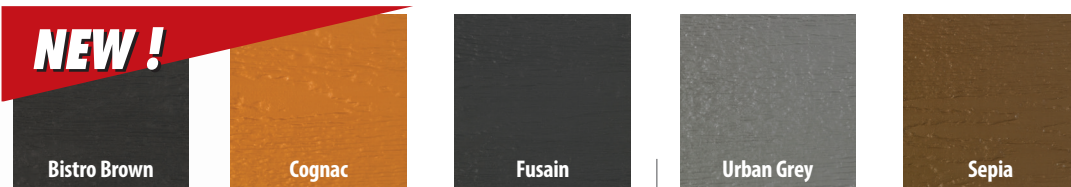

- Paint meets stringent standards of VOC\* emission
- The wood preservative is non-arsenic based
